Professional Summary

Final-year Computer Science and Engineering student specializing in Data Science, targeting entry-level Java Backend Developer and Software Engineer roles. Hands-on project experience building RESTful APIs and full-stack applications using Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, and MySQL. Implemented JWT authentication, role-based authorization, Redis caching, Kafka messaging, and WebSocket-based real-time updates. Strong foundation in Object-Oriented Programming, Data Structures and Algorithms, DBMS, and software engineering principles.

Technical Skills

- **Languages:** Java, SQL, Python, JavaScript
- **Backend Development:** Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, RESTful APIs, API Design, JWT Authentication, BCrypt, Role-Based Access Control, Layered Architecture, Exception Handling, Input Validation
- **Databases and Caching:** MySQL, Redis, RDBMS, SQL Queries, Database Design, Data Modeling, Caching Strategies, TTL Expiration
- **Messaging and Distributed Systems:** Apache Kafka, Event-Driven Architecture, Asynchronous Messaging, WebSocket, Distributed Systems Fundamentals
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Axios
- **Tools and Testing:** Git, GitHub, Maven, Docker, Postman, JUnit, API Testing, Debugging
- **Core Computer Science:** Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, SDLC

Professional Experience

Frontend Development Intern – Cognifyz Technologies *Feb 2026 – Mar 2026*

Frontend Development

- Developed five responsive web pages using HTML, CSS, and JavaScript, ensuring consistent layouts across mobile, tablet, and desktop devices.
- Built reusable UI components and interactive client-side features to improve usability and maintainability.
- Implemented navigation, form validation, and event-driven functionality to support reliable user interactions.
- Debugged interface issues and refined layouts to improve responsiveness and cross-device compatibility.

Projects

SmartFleet – Real-Time Fleet and Delivery Management System *2026 | GitHub*

Java, Spring Boot, MySQL, React, Apache Kafka, WebSocket, Redis, JWT, Spring Security, Leaflet

- Developed a full-stack fleet management platform using Spring Boot, React, and MySQL with layered Controller-Service-Repository architecture for customers, drivers, vehicles, orders, and tracking.
- Secured REST APIs using Spring Security, JWT authentication, BCrypt password hashing, and role-based authorization for ADMIN and DISPATCHER roles.
- Implemented Kafka-based messaging and WebSocket updates for real-time driver location tracking, displaying live location information on a React dashboard using Leaflet.
- Integrated Redis to cache current driver locations and statuses, supporting faster retrieval of frequently accessed tracking data.

Smart Product Management and Caching Platform *2026 | GitHub*

Java, Spring Boot, Spring Data JPA, MySQL, Redis, React, Axios

- Built RESTful product management APIs using Spring Boot, Spring Data JPA, Hibernate, and MySQL, integrated with a React frontend through Axios.
- Implemented Redis caching with TTL-based expiration to cache frequently accessed product data and reduce repeated database queries.
- Developed top-five most-viewed and recently viewed product features using Redis Sorted Sets and Lists.
- Integrated React with backend REST APIs for product management, product retrieval, and popularity tracking.

Education

MVJ College of Engineering Bengaluru, Karnataka

Bachelor of Engineering – Computer Science and Engineering (Data Science) 2023 – 2027

CGPA: 8.61/10

Certifications

- **Oracle AI Foundations Associate – Oracle**
- **Google Analytics Certified – Google**
- **Problem Solving (Basic) – HackerRank**
